

Odyssey 2011

Video tutorials are available:

1. Go to: www.compasslearning.com/impact
2. Pick a time... pick the central standard without the states in parentheses
3. The next page will ask for a user name and password. User: 5019908, PW: Compass10
4. You are now in the Compass Learning IMPACT Teacher Academy.
5. Scroll to the very bottom of the page. Next to the "Content" tab, click on the tab titled "All Videos" (the tabs are hard to read because the text is white), you will find lots of videos to choose from.

Note:

If you log-on as a student, the student does have things available to work on, **but these are not assignments**. They are "subject level access" activities. Activities by grade level are automatically available for students to work on. When a teacher makes an assignment, it will override the "subject level access" activities and a thick gold ring will appear around the subject circle. If a student completes assigned work, the "subject level access" activities will appear again. This way students always have something to experience when on Odyssey. When you generate student reports, only the teacher assigned activities will have a score next to them.

When you first log in to Odyssey 2011, you'll see a Teacher Dashboard page.

It will contain your students and give you a lot of information on students, assignments, progress, etc. once you start using the program.

A good video to watch is called **Teacher Dashboard**..this has some new helpful features this year, that we can't yet explore because there's no student data in your accounts yet.

The tabs at the top provide the navigation around the site.

The first Tab, My Students, Will contain your classes.

The My Students Manager in the main window provides information on using this page.

The third tab, Assignment, has some familiar buttons on it: Assignment Builder, being one that is used often.

The Assignment Builder works like it did last year.

Choose a curriculum from the top tabs: Odyssey Curriculum, Explorer, Exp. TX, Math Intervention, Common Core.

Choose a Subject,
Choose a grade

Then select activities.

The Assessment tab is where the Test Builder is, now.

The test builder allows you to build tests and create learning paths for all grade levels.

It includes STARR items also.

The wizard works like it did last year.

The Reports page will have links to all of your reports.

The far right box has information on the new features of this page.

There are short (3-5 minute) videos on the video site about this page also.

The Content tab is where the Curriculum Index and Resources are located.

The Curriculum Index and Resources look like last year's Odyssey.
