

Accessing the Internet on your iPhone or iTouch

These instructions are for use by Eanes employees only. Guests are to use the *Guest* server.

Step 1: Click on the **Settings** menu on the main screen of your iPhone.

Step 2: Click on **Wi-Fi** from the menu.

Step 3: Make sure the Wi-Fi is on and click on the blue arrow to the right of *EPAWN*.

Step 4: On the *Enter Password* screen, enter your Novell username and password and click on **Join**.

Step 5: On the *Certificate* screen, click on **Accept**.

You will be brought back to the *Wi-Fi Networks* screen where **EPAWN** will be selected. Click on the blue arrow on the right-hand side of the *EPAWN* tab to display the *EPAWN* screen.

Step 6: Scroll down to the HTTP Proxy menu section and click on Manual. Enter the following information in the appropriate fields:

Server: **proxy1.eanesisd.net**

Port: **8080**

Authentication: **ON**

(Username and Password should be auto-filled with your Novell information)

Your iPhone should now be connected to the Internet through the EPAWN network.

*****NOTE***** If you change your Novell GroupWise password, you will need to change your password in EPAWN as well for your messages to sync. Simply navigate to Settings>>Wi-Fi>>EPAWN to change your password and sync your messages.
