

WebDav Nav

1. Create a folder.
2. Refresh window. Need to do this sometimes after you save a doc
3. Allows you to select images/movies from your iPad.
4. Allows you to select multiple images from your iPad.
5. Allows you to take a pic w. iPad and save it into your home folder.
6. Pulls images and movies from any folder within your home folder
7. Allows you to bookmark high use folders. Could be used for easy access. For example a folder on x-drive so you don't have to navigate to it. Touch the star to access saved folders. After tapping the star touch the + sign to add a bookmark. Allow you to store files on the local drive so you can view them off line.

1. 2. 3. 4. 5. 6. 7.

1. When you find the file you want to open, hold your finger down on it and you will get these options:

2. Choose:

3. After you finish working on the doc, click on the wrench and choose Share and Print. It is here that you will see the WebDav option. Select that option and then this box will appear:

4. Select the format you want to save it to WebDav in.
