

Assignment Plan iMovie-Colonial America

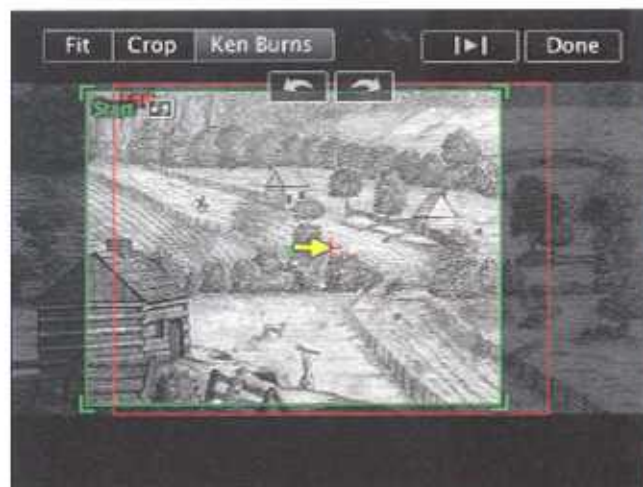

1. Login with your Novell password (note the Mac # you are using)
2. Open up iMovie from the bottom bar
3. Choose File New Project, name it and change the aspect ratio to STANDARD
4. Click CREATE
5. Click STUHOME folder from the bottom bar (sometimes it starts out as a question mark and go to your home folder)
6. Drag and drop your pictures to the project window

7. Click on a clip (it will turn yellow)
8. Change the duration (how many seconds the clip plays) by clicking EDIT-SET DURATION

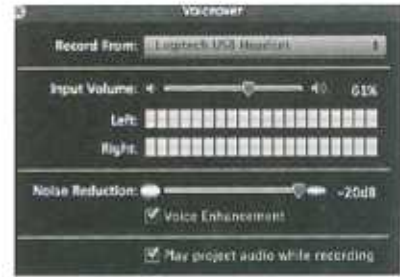

9. Click on the cropping tool  to set up the Ken Burns effect. Use the green square to start the effect and use the red to focus where you want to end, the arrow shows how it will pan. Click DONE

10. Click on the  and make sure that the LOGITECH USB HEADSET is chosen, and PLAY PROJECT AUDIO WHILE RECORDING

11. With that window open, click on a clip at the part you want to start your narration. It will count down from 3 to 1, speak clearly into your mic, **click anywhere to stop**. A purple voiceover icon track will show up below your clip. Click and choose delete if you need to do it again.

12. Add a title: Click the  and drag a title from the title window to your project area
 a. Click on the words to edit your title then click DONE.
 b. To delete a title, click on it and hit delete
 c. To edit a title click on your workspace (not a clip), go to your title, click and edit it in the right workspace area

13. Add a transitions: Click on the Transitions  button and choose a transition. Drag it in between the two clips where you want it to show up.

14. **Finishing your movie:** Click SHARE-Export using QuickTime

15. Name your project and in the WHERE section, choose DESKTOP

16. After it is done processing, drag your movie to copy it into your home folder or the student shared
