

Using the Flip Video Camera

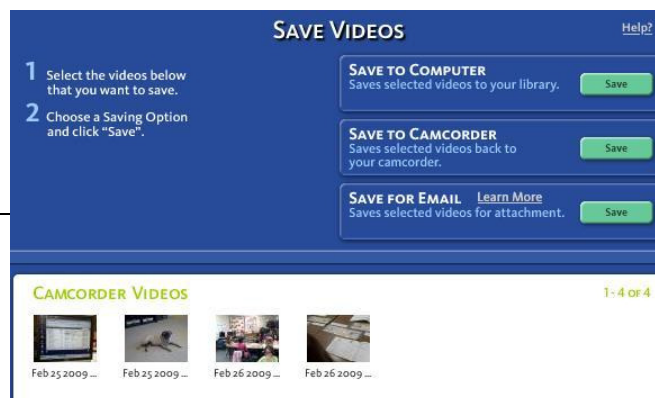

1. Slide the USB latch down. The USB arm flips up automatically.
2. Connect the camcorder to the computer and you will automatically get this pop-up window. Click **OK**.

3. At the next window, you will see all of the videos on the camera. Click on **Save Videos**.

4. At the next screen, click on the video that you want to save and then click on **Save to Computer**.

5. On the **Save to Computer** screen click on either **Create an Album** or click on an album that you have already created. Click **Save**.
